Introduction

Cette bibliographie répertorie sept cent dix bibliographies sur les transports et des domaines connexes. Les documents inclus dans cette bibliographie ont été publiés entre 1972 et 1976 inclusivement. Les références sont présentées selon l'ordre alphabétique des noms d'auteurs, à l'intérieur des thèmes suivants: I - Air Transportation. II - Containerization. III - Energy and Environment. IV - Freight Transportation. V - Highway Transportation. VI - Land Use. VII - Metropolitan Areas. VIII - Motor Vehicles and Traffic. IX - New Towns. X - Physical Distribution. XI - Pipelines. XII - Rail Transportation. XIII - Roads and Traffic. XIV - Transportation. XV - Travel. XVI - Urban Transportation. XVII - Water Transportation.

Le lecteur qui désire des références sur un sujet précis peut consulter à la fin de la bibliographie, l'index des sujets. Une vedette-matière a été donnée à chaque référence incluse dans cette bibliographie. Cette vedette-matière joue le rôle du mot-clé principal qui donnera accès à toutes les références concernant le même sujet. Ainsi, le lecteur qui désire des références sur les pistes cyclables, par exemple, doit regarder dans l'index au mot "Bicycles". Ce mot le renvoie aux différentes références incluses dans cette bibliographie concernant ce sujet. Les vedettes-matières qui constituent l'index des sujets, sont placées selon leur ordre alphabétique. Elles renvoient à un numéro qui précède la référence à l'intérieur de la bibliographie. Il est à noter que les vedettes-matières de même que les thèmes de cette bibliographie sont en langue anglaise. Cela est dû au fait que la presque totalité des références qui composent cette bibliographie sont en langue anglaise.

Cette bibliographie n'est pas exhaustive. Nous avons consulté les sources bibliographiques les plus courantes dans le domaine des transports, à savoir les répertoires suivants: HRIS Abstracts; Current Literature in Traffic and Transportation, Transportation (Weekly Government Abstracts); nous avons consulté également les listes d'acquisitions publiées régulièrement par des bibliothèques spécialisées, telles l'Institute of Transportation Studies (University of California), le Centre de Recherche et de Développement de Transports Canada (à Montréal) ou encore la bibliothèque du ministère des transports du Canada.

Nous espérons sincèrement que cette bibliographie sera utile à tous ceux qui oeuvrent dans le domaine des transports.

Jean-Paul Reid
Bibliothécaire

PRESENTATION

This bibliography covers seven hundred and ten bibliographies on transportation and various related subjects. The materials selected for inclusion in this bibliography have been published between 1972 and 1976. Entries are arranged alphabetically by author's names, and are grouped under the following topics: I - Air Transportation. II - Containerization. III - Energy and Environment. IV - Freight Transportation. V - Highway Transportation. VI - Land Use. VII - Metropolitan Areas. VIII - Motor Vehicles and Traffic. IX - New Towns. X - Physical Distribution. XI - Pipelines. XII - Rail Transportation. XIII - Roads and Traffic. XIV - Transportation. XV - Travel. XVI - Urban Transportation. XVII - Water Transportation.

The reader who wishes to obtain a rapid overview of a specific subject can refer to the subject index at the end of the bibliography. A subject-heading has been assigned to each item in the bibliography. This subject-heading stands for the main concept which leads to all the documents relevant to the same subject. Thus, the reader, searching bibliographies relevant to the subject "bicycle-tracks", for example, must look for the word "bicycle". The subject-headings are arranged in alphabetical order within the subject index.

Throughout the bibliography, entries are numbered consecutively. The subject index refers to these accession numbers. The word "bicycle" will direct the reader to the accession numbers of the bibliographies on this given subject.

It should be noticed that the subject-headings, as well as the topics of this bibliography, are in English. This is due to the fact that most bibliographies compiled are written in English.

This bibliography is not exhaustive. We have consulted the best known bibliographical sources on transportation; for example: HRIS Abstracts, Current Literature in Traffic and Transportation, Transportation (Weekly Government Abstracts); we have also consulted the acquisitions' lists published regularly by specialized libraries, such as the Institute of Transportation (University of California), the Transportation Research and Development Centre of Transport Canada (Montreal) and the Library of the Department of Transportation of Canada.

We sincerely hope that this bibliography will be of use to those working in the field of transportation.
